Overview

Change management is vital for organizations to address resistance arising from both emotional and functional factors. Emotional resistance, such as fear of uncertainty, and functional resistance, like concerns about inefficiency, can hinder change efforts. However, through transparent communication, employee involvement in decision-making, and providing necessary support and training, change management can alleviate resistance and facilitate smoother transitions. Moreover, it cultivates a culture of innovation and continuous improvement, leading to enhanced employee engagement, productivity, and adaptability. A well-executed change management strategy ensures alignment between organizational goals and individual objectives, fostering employee buy-in and commitment, thus driving successful change implementation.

Scenario

Via Corporation, a prominent real estate entity valued at USD 2.1 billion, spanning its operations across multiple states in the United States, recently completed the acquisition of Eco Corporation, a nascent company within the same industry. The strategic move aimed to elevate Via's operational capabilities and consolidate its standing in the market. However, the integration journey encountered obstacles, notably within the human resource department, as the distinct culture and practices of Eco Corporation diverged from the established norms of Via Corporation.

In response to these challenges, the participant takes on the role of a consultant. Their specific responsibility is to initiate and supervise systematic interventions designed to prompt change and improve overall performance. Equipped with detailed organizational structures and comprehensive data, covering personal, personality, and network-related information, the consultant is tasked with skilfully addressing resistance. They must consider relationship dynamics and team interactions to optimize the collective performance of the workforce. The intervention process is methodically planned, beginning with three key stages: creating awareness, fostering motivation, and securing commitment. The participant's expertise holds significant importance in harmonizing organizational cultures and ensuring the seamless integration of the two workforces.

Objectives

The simulation focuses on diverse interventions for change management, enhancing participants' understanding of power dynamics, influence, and resistance. Through structured interventions, the goal is to boost critical thinking and people management skills, empowering participants to lead successful change initiatives in various organizational contexts.

Game Arena

The major sections under the game arena includes:

- a. **Introduction:** This section provides an overview of how the entire simulation works and the steps to follow.
- b. **Memo:** The participant receives a memo detailing the recent acquisition of a company. Task is to absorb the information, understanding the intricacies of the acquisition, key changes, and potential challenges that may arise during the integration process.
- c. **Human Dynamics:** Delve into the personal and professional dynamics of the individuals affected by the change. Identify preferences, relationships, and potential influencers within the group, laying the groundwork for a tailored change management strategy.
- d. **Awareness:** This section, begins with the awareness phase of change management by implementing exercises that promote open communication and mutual understanding within the team. These selected activities are designed to cultivate a unified comprehension of the upcoming changes and their consequences, thereby fostering a collective awareness among team members.
- e. **Motivation:** Transitioning to the motivation section, capitalize on the established awareness by implementing exercises that ignite inspiration and energy among individuals. These activities are tailored to elevate morale, cultivate a positive outlook, and foster a sense of shared purpose in embracing the upcoming changes.

- f. **Commitment:** In the commitment stage, select exercises specifically designed to reinforce the team's dedication to the change initiative. These activities are crafted to instil a sense of ownership, promote collaboration, and cultivate unwavering dedication, ensuring that individuals are actively involved in the process and fully committed to achieving the shared objectives.
- g. **Decision Checklist:** In this section, participants can review the decisions and submit the decisions.
- h. **Report:** Conclude the game by analysing the feedback and assessing the impact of the implemented exercises on individual and team performance. Then compile a report summarizing the observed changes, and insights gained throughout the change management decision-making process.
- i. **Synopsis:** Contains the summary of the decisions took by the participant for the round.

Critical Parameters

Food For Thought: This segment provides crucial aspects to consider, offering valuable insights for decision-making.

Figure 1The food for Thought Section in the platform

Human Dynamics: In the human dynamics section, delve into the organizational hierarchy, employee profiles, and working relationships to identify individual preferences, leadership styles, and potential influencers. This comprehensive understanding sets the stage for a tailored change management strategy that addresses the unique dynamics of the team. Additionally, analyse areas of expertise, working preferences, and strengths and weaknesses to inform interventions and support needed during the transition. By leveraging individual strengths and mitigating potential challenges, you can effectively tailor interventions at the individual, organization-wide, or group levels to ensure successful change implementation.

Organizational Hierarchy

Figure 2 Organizational Hierarchy under Human Dynamics Section

The strategic selection of change agents is crucial in navigating the complexities of change implementation. Recognizing the intricate nature of change implementation and the necessity of engaging the right individuals, the selection of change agents emerges as a prudent approach. These individuals serve as catalysts, gradually introducing the change to a wider audience as they gain expertise.

In the human dynamics section, an organizational hierarchy is provided, offering insights into the change agents. Six employees are chosen strategically from diverse departments and experience levels to spearhead the initial phase of change. Leveraging their perspectives, these change agents facilitate smoother transitions and promote buy-in across the organization. Additionally, cultivating a network of champions further supports the change agenda, ensuring successful implementation and organizational transformation. These change agents serve as catalysts, gradually introducing the change to a broader audience as they accumulate knowledge and expertise.

Employees Profile

The employee profiles include detailed information on various aspects such as work preferences, passions, strengths, and weaknesses. For instance, Mr. Thappar prefers to work in deadline-driven teams that prioritize collaboration and precision where Mrs. Pratap balances solo performance with teamwork as necessitated by her job role. Mr. Roy enjoys collaborative environments, especially those where he can involve friends and family in wealth-building activities. Mrs. Barclay favors teamwork, particularly with forward-thinking individuals.

Mr. Thappar is enthusiastic about building organizational value and contributing to growth. Mrs. Pratap is passionate about project financing, valuation, and understanding people. Mr. Roy is driven by the goal of creating wealth and ensuring the prosperity of his loved ones. Mr. Saxena is passionate about software and technology's role in transforming real estate valuation processes.

Notable strengths include Mr. Thappar's pacesetting leadership style and expertise in managing multimillion-dollar projects. Mrs. Pratap excels in understanding people and brings valuable contributions to her work. Mr. Roy possesses strong problem-solving skills and is adept at building relationships. Miss Mehta is process-oriented and skilled in number crunching.

In terms of weaknesses, Mr. Thappar acknowledges that his relentless pursuit of perfection can sometimes hinder progress. Mrs. Pratap recognizes that she needs to further develop her organizational skills. Mr. Roy is aware that his fear of not solving a problem can occasionally impede his performance. Miss Mehta struggles with seeking help when needed.

Figure 3 Employees Profile under Human Dynamics Section

Working Relationship

The working relationship figure available under the human dynamics section provides insights into the interactions between each team member. Positive (P) relationships denote warmth, negative (N) relationships indicate hindrance, and neutral (Nu) relationships signify neutrality.

Understanding these working relationship parameters is paramount for change management initiatives. It empowers change managers or the change consultants to foster collaboration, resolve conflicts, optimize team dynamics, facilitate decision-making, and enhance employee well-being.

By leveraging positive working relationships and addressing potential challenges, change managers can significantly improve the prospects of successful change implementation and organizational transformation.

Figure 4 Working Relationship under Human Dynamics Section

Major Decision Areas

Stage 1 – Awareness

In Stage 1 of the change management process, known as the awareness stage, providing adequate information and raising awareness about the impending changes are crucial. The Decision tab contains the initial level of awareness for each change agent involved. The objective is to select the most appropriate organization-wide, individual, and group-level interventions tailored to each employee and based on the team dynamics.

When making decisions, several key parameters should be considered:

1. **Understanding the Goal:** Each intervention should align with the specific goals of the change initiative. Assess whether a particular intervention suits a specific employee or group and contributes to achieving the desired outcomes.
2. **Cost Considerations:** Evaluate the cost associated with each intervention, including financial expenses, time commitments, and resource allocation. Opt for interventions that offer the best value and fit within the allocated budget.
3. **Time Availability:** Take into account the available time of each individual when selecting interventions. Ensure that interventions can be accommodated within their schedules without causing undue strain or disruption to their regular duties.
4. **Current Awareness Level:** Consider the existing awareness level of each person regarding the proposed changes. Choose interventions that address knowledge gaps and effectively communicate the objectives and benefits of the change initiative.
5. **Relationship Dynamics:** Factor in the working relationship parameters when choosing group-level interventions. Customize interventions to leverage positive relationships, address conflicts, and foster collaboration among team members.

By carefully considering these parameters, the participants can customize interventions to suit the needs and circumstances of each employee and group. This tailored approach maximizes the effectiveness of the change management process and enhances the likelihood of a positive outcome.

Figure 8 Group Level Interventions available under Awareness Stage

Stage 2 – Motivation

During Stage 2 of the change management process, referred to as the motivation stage, it's vital to stimulate the desire to enact change and furnish supplementary information to enhance motivation. Transitioning to the motivation section, capitalize on the established awareness by implementing exercises that ignite inspiration and energy among individuals. These activities are tailored to elevate morale, cultivate a positive outlook, and foster a sense of shared purpose in embracing the upcoming changes. The Decision tab includes the initial motivation level for each change agent. The aim is to choose the most appropriate interventions at the organizational, individual, and group levels, tailored to suit each employee and team. Factors like aligning goals, assessing cost and time implications, gauging motivation levels, and understanding relationship dynamics must be taken into account during this phase.

Stage 3 – Commitment Stage

During the commitment stage of the change management process, the focus shifts towards solidifying the commitment of individuals and teams to embrace the change fully. In this stage, it is essential to reinforce the motivation gained in the previous stage and ensure that individuals are fully invested in the change initiative. The Decision tab continues to play a crucial role, providing insights into the current level of commitment for each change agent. Building upon this information, the objective is to select interventions that foster ownership, collaboration, and dedication among employees. Factors like aligning goals, assessing cost and time implications, gauging current commitment levels, and understanding relationship dynamics must be taken into account during this phase.

Decision Checklist

The decision checklist meticulously outlines the choices made by the participant. If the participant is satisfied with their decisions, they can proceed to the Submit option to save them. It is crucial to note that once decisions are submitted, they cannot be altered. Therefore, participants need to exercise caution and ensure careful consideration before finalizing and submitting their choices.

Figure 9 The decision checklist in the simulation

Report Analysis

The report section consists of detailed information on how well the participant took the overall decision. This section consists of feedback on the performance of the participant based on four metrics.

- **Rigour:** Consistency throughout the decision-making and recommendation.
- **Structuring:** Logical approach of gathering and analysing information
- **Synthesis:** Approach towards interpreting information and making informed decisions
- **Business Judgement:** Ability to evaluate facts and consider risks and possible implications when making decisions.

Figure 10 The Report Section

- The report also contains details on the Employee performance level, Unutilised time of employees, Budget utilised, Group KPI as well as employee working relationship.

Employee Performance Level:

Employee performance level is a function of the interventions applied at individual, organization wide as well as team level. If right interventions are applied to the right combination of groups, this will result in elevated performance which is visible as percentage increase.

Unutilized Time of Employees:

The Unutilised time section assess how effectively each employee's time is utilized, or can be optimized better.

Budget Utilization:

The report outlines the budget allocated for various stages of integration and evaluates its utilization. By tracking expenditures and assessing remaining funds, the change agents can make informed decisions to support the successful completion of the acquisition.

Group KPI:

The Group Key Performance Indicators (KPIs) gauge the effectiveness of interventions in driving progress across different stages of change integration. These metrics provide insights into the impact of change initiatives on organizational performance.

Strong interpersonal relationships are vital for navigating the complexities of an acquisition. The report evaluates improvements in employee working relationships resulting from interventions implemented. By fostering collaboration and communication among team members, the change agents contribute to a cohesive and supportive work environment, essential for a successful integration process.

Budget, INR		Group KPI	
Budget Allocated	250000	Awareness Level %	56
Remaining budget, Awareness stage	205000	Motivation Level %	50
Remaining budget, Motivation stage	133000	Commitment Level %	46
Remaining budget, Commitment stage	59200	Performance Level %	50

Individual Activity Intervention	Monthly Q & A
Individual Activity applied to	Rajas, Neha and Rajat
Group Activity Intervention	Role Playing Simulation
Group Activity applied to	Anne, Priya, Neha, Rajat
Stage 3 - Commitment	
Organization Wide Intervention	Enrichment of Goals
Individual Activity Intervention	Redesigning
Individual Activity applied to	Neha and Rajat
Group Activity Intervention	Fun Lunch
Group Activity applied to	Kabir, Rajas, Neha, Rajat

In the initial stage of awareness during an organizational merger, a comprehensive set of interventions is proposed to ensure a smooth transition and uphold employee morale. These interventions are meticulously tailored to benefit all participants, taking into account their time availability and current awareness levels.

Awareness Stage Interventions

1. Memo from CEO: Organization-wide Intervention

This initiative entails delivering a personalized message from the CEO to all employees, regardless of their position within the organization. Such recognition from top leadership serves to foster a sense of value and appreciation among team members, instilling a shared sense of purpose and commitment during the merger process.

- Effectiveness: By directly engaging with employees at all levels, the memo from the CEO helps to strengthen employee morale and dedication. Its cost-effective nature makes it accessible to all, ensuring that everyone feels included and valued from the outset of the merger.

2. Mental and Physical Well-being Focus: Individual Activity Intervention

The organizational focus on mental and physical well-being provides resources and support to promote a healthy work-life balance for all employees. This intervention underscores the organization's commitment to the overall well-being of its workforce, ultimately enhancing productivity, engagement, and resilience.

- Effectiveness: By prioritizing employee health and wellness, the organization demonstrates its dedication to supporting individuals in navigating the challenges of the merger. By providing accessible resources and support, employees are better equipped to maintain their well-being, fostering a positive and resilient work environment.

3. Ice Breaker Session: Group Activity Intervention

- This intervention is designed to bring together team members from various departments and hierarchical levels to foster communication and relationship-building. By providing a structured platform for interaction and collaboration, the ice breaker session facilitates connections among colleagues and establishes a foundation of trust within the team.

- Effectiveness: The inclusive nature of the ice breaker session ensures that all team members, including those who may be more reserved, have the opportunity to engage and connect with their colleagues. By breaking down barriers and fostering a sense of

camaraderie, this intervention promotes a collaborative and cohesive team dynamic essential for navigating the complexities of the merger.

Overall, these interventions are strategically designed to address the diverse needs of all participants in the initial stage of the merger process. By promoting recognition, well-being, and communication, the organization lays the groundwork for a successful transition while maintaining employee morale and commitment.

Motivation Stage Interventions

1. Setting of Goals (Organization-wide Intervention)

- This intervention involves setting clear and specific goals for the entire organization. Goals could include targets for sales, production, innovation, or any other relevant metrics
- Effectiveness: Goal-setting is effective for individuals who are motivated by achievement and progress. By providing clear targets and milestones, this intervention gives employees something concrete to strive for, enhancing their motivation and focus.

2. Monthly Q & A (Individual Activity Intervention)

- Regular Q&A sessions are organized where individuals can ask questions, seek clarification, and engage in open dialogue with leadership or subject matter experts.
- Effectiveness: This intervention is particularly valuable for individuals who seek clarity and understanding. By providing a forum for addressing questions and concerns, it helps employees feel informed and involved, thereby increasing their motivation and commitment to their work.

3. Role-playing Simulation (Group Activity Intervention)

- Here the team members engage in role-playing simulations, allowing them to practice and apply their skills in a dynamic and interactive environment.
- Effectiveness: This intervention is ideal for team members who enjoy experiential learning and hands-on activities. Role-playing simulations provide a practical and engaging way for employees to develop their skills, boosting their motivation and confidence in their abilities.

Commitment Stage Interventions

1. Enrichment of Goals (Organization-wide Intervention)

Collaborative activities such as Management by Objectives (MOB) are introduced to solidify commitment among team members. MOB involves setting goals collaboratively, aligning individual objectives with organizational priorities.

-Effectiveness: By involving employees in goal-setting and emphasizing collective success, this intervention fosters a sense of shared responsibility and commitment to achieving organizational objectives.

2. Redesigning (Individual Activity Intervention)

Employees are encouraged to redesign processes and workflows, emphasizing adaptability and innovation.

- Effectiveness: Redesigning processes signals a willingness to embrace change and adapt to evolving circumstances. By highlighting the importance of innovation and continuous improvement, this intervention fosters a culture of commitment to organizational success.

3. Fun Lunch (Group Activity Intervention)

Social activities such as Fun Lunches are organized to promote camaraderie and teamwork among employees.

- Effectiveness: Fun Lunches contribute to commitment by fostering a positive team culture and strengthening relationships among team members. By creating opportunities for social interaction and bonding, this intervention reinforces the importance of individual contributions to the overall team dynamic.

Overall, these interventions are tailored to address the specific motivational and commitment needs of employees at different stages of organizational change, ultimately contributing to a positive and productive work environment.

Implementation – Methodologies

From our experience, we have seen Professors using two different teaching plan options. Option A is for the one who is pressed on time while option B offers a chance to participants to use the module multiple times and learn from their past decisions.

Option A

To begin, the instructor should introduce the module with the walkthrough video, explaining to the students all the different decision-making points involved in the module and how to connect them with one another (with the use of teaching notes provided by Cesim). The instructor should then provide the opportunity for the students to play the module by themselves. The students can play the module within a team or individually. Once the module is over, the instructor can quickly review the decision-making made by the students along with the results they achieved. The instructor can compare the results of different students across the module and then debrief them while driving a discussion in the class.

1. Introduction (5 minutes)
2. Run Simulation (30 to 35 minutes)
3. Debrief (10 minutes)
4. Conclusion (8 to 10 minutes)

Option B

To begin, the instructor should introduce the module with the walkthrough video, explaining to the students all the different decision-making points involved in the module and how to connect them with one another (with the use of teaching notes provided by Cesim). The instructor should then provide the opportunity for the students to play the module by themselves. The students can play the module within a team or individually. The instructor should debrief them in short. The instructor should ask the students to play the module again with the same scenario or if they want to change some parameters that can be done. The students again played the module and completed it.

Once the module is complete the instructor can quickly review the decision-making made by the students along with the results, they achieved across the rounds to compare their progress, trends, and approach towards the module. The emphasis of this plan is to let the students play the module multiple times so they can learn from their previous rounds.

The instructors generally ask students to play the module 3 times, whereas the 3rd time is for inculcating concepts.

1. Introduction (5 minutes)
2. Run Simulation (30 to 35 minutes)
3. Debrief (10 minutes)
4. Run Simulation (30 to 35 minutes)
5. Conclusion (8 to 10 minutes)
6. Run Simulation (self-paced at their own time)
7. Short Presentation & Takeaway.

Case Customization

The case can be customized based on the faculty's requirements, providing the flexibility to enable or disable specific decision tabs within each module. Additionally, various parameters, such as market outlook, demand data, investment details, etc., can be adjusted to meet specific needs.

Concepts Covered

Internalizing change

going beyond surface-level acceptance and fully embracing and integrating the change into one's identity or organizational culture.

Stages through which change internalization happens:

1. Awareness
2. Motivation
3. Commitment

Resistance To change

In the dynamic business environment, continual adaptation is imperative to stay competitive and align with industry standards. Despite its inevitability, implementing change strategies presents formidable challenges, often resulting in unsuccessful endeavours. A pivotal factor
confidential & private, all rights reserved to Cesim India Pvt Ltd

contributing to these setbacks is the resistance stemming from employees' attitudes towards change.

Reasons for Resistance: five primary reasons employees resist change:

1. Organizational culture issues
2. Lack of awareness and knowledge about change
3. Lack of support and commitment for change management
4. Misalignment of project goals and personal incentives
5. Lack of confidence in their ability to manage change

Owing to a lack of awareness about the potential advantages of organizational change, employees frequently harbor apprehensions and perceive the introduction of change as unjust. This negative perception manifests as resistance to change (RTC), a critical phenomenon that must be addressed for successful implementation. It becomes essential to actively shape and manage employees' resistant attitudes. The preparedness of employees for change emerges as a significant influencer, capable of positively transforming their attitudes in favor of the impending change.

Resistance Management

Rethink “Participation” - Aims to engage employees and stakeholders in decision-making, fostering a sense of ownership and buy-in.

1. Transparent Communication through Clear Communication Channels
2. Involvement in planning, Empowerment and Autonomy
3. Feedback Mechanisms
4. Training and development
5. Change Champions and Ambassadors
6. Recognition and Rewards
7. Collaborative Problem-Solving
8. Pilot Programs and Testing

Unveil the True Nature of Resistance

- Resistance is not solely a reaction to technical change, such as the implementation of new software or equipment.
- They are often accompanied by social changes—the shifts in human relationships, roles, and dynamics within an organization.

Constructive Management Strategies

- Emphasizing New Standards
- Encouraging New Thinking
- Using Resistance as a Warning Signal
- Effective Leadership at Meetings

Models to Change Management

Kurt Lewin, a pioneer in social psychology, revolutionized the understanding of group dynamics and organizational change. He has introduced the three-stage change model encompassing unfreezing, changing, and refreezing. The primary resistance to change occurs during the unfreezing stage when individuals resist letting go of established behaviours. Lewin stressed the significance of building awareness and preparing individuals for change to mitigate resistance.

John Kotter, a renowned leadership and change management expert, has made significant contributions to guiding organizations through successful transformations. His widely acclaimed eight-step change process underscores the necessity of creating a sense of urgency and effective communication to address resistance and drive successful change initiatives. This model provides a structured approach to navigating the complexities of change.

1. Create a Sense of Urgency: Convey why change is necessary and its urgency.
2. Build a guiding Coalition: Build a dedicated team of leaders to drive change.
3. Form a strategic Vision for Change: Develop a clear and inspiring vision for the future.
4. Enlist a volunteer Army: Mobilize a dedicated and passionate group of volunteers who share a common goal and are committed to actively contributing to achieve it collectively.
5. Enable Action by Removing Barriers: Remove the obstacles that slow things down or create roadblocks to progress.

6. **Generate Short-Term Wins:** Wins are the molecules of results. They must be recognized, collected, and communicated – early and often – to track progress and energize volunteers to persist.
7. **Sustain Acceleration:** Maintain momentum and continuously drive change with increased credibility, improving systems, structures, and policies until the vision is fully realized.
8. **Institute Change:** Establish and reinforce change by highlighting the link between new behaviours and organizational success, and by aligning systems and processes to support and sustain these changes.

Suggested Discussion Starters

1. How does effective change management contribute to organizational success and growth?
2. Can you share examples of organizations that have benefited from well-executed change management initiatives?
3. What are the consequences of neglecting change management in an organization?
4. Can you identify common communication challenges during change initiatives, and how can they be addressed?
5. What role does leadership play in overcoming resistance to change within an organization?
6. Can you share individual experiences of change resistance and how it was addressed?
7. What strategies can leaders use to create a culture of openness and receptiveness to change?
8. How does involving employees in the change process affect their resistance levels?
9. Can you provide examples of organizations successfully applying specific change management models?
10. Discuss the stages in change models such as Kotter's 8 step model of change, ADKAR model, Lewin's change management model etc.
